SUMMARY

MERN Stack Developer skilled in MongoDB, Express.js, React, and Node.js with experience in building responsive full-stack applications, REST APIs, and modern UI using Tailwind CSS. creating RESTful APIs, handling authentication, and managing databases efficiently.

TECHNICAL SKILLS

Front End	React JS (Hooks, Components, useEffect, RESTAPI, State Management, Routing, etc.,
Backend	Node.js, Express.js, RESTful API Development, JWT, Authentication/Authorization
Database	Database MongoDB, Mongoose, MySQL
Languages	HTML5, CSS/CSS3, JavaScript, ES6 Features
Styling	Tailwind CSS
Layout	Flexbox and CSS Grid, Responsive web designing
Tools	Git and Github, VS code, NPM

Key Responsibilities:

- Developed and maintained responsive full-stack web applications using React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, and JavaScript (ES6).
- Built reusable component-based UI structures in React.js to improve code maintainability and scalability.
- Implemented modern layouts using Flexbox and CSS Grid to ensure responsive and cross-device compatibility.
- Styled applications using Tailwind CSS for consistent and efficient UI development.
- Developed RESTful APIs using Node.js and Express.js to handle server-side logic and data processing.
- Designed and managed MongoDB databases using Mongoose for efficient data storage and retrieval.
- Integrated frontend React applications with backend APIs for dynamic data rendering and seamless user interaction.

Experience/Internship Training :

HCL Guvi

JAN-26 to APR-26

1. Public Holiday Finder Application:

(Jan-26 – Feb-26)

Team: 5

Project Description:

Developed a responsive web application that allows users to search and view public holidays by selecting a specific country and year. The application dynamically fetches holiday data from a public API and displays detailed information including holiday name, date, day of the week, country code, and type. It also provides functionality to export the results as a CSV file and stores user search history using browser local storage.

Tech Stack:

HTML5, CSS3, React.js, Tailwind CSS, REST APIs, React Router, Responsive Web Design

Roles & Responsibilities

- Designed and developed reusable UI components using React.js and Tailwind CSS.
- Implemented client-side routing using React Router for seamless navigation.
- Integrated REST APIs using Fetch API / Axios to dynamically retrieve country and holiday data.
- Built search functionality to filter holidays by country and year with real-time updates.
- Implemented Dark/Light mode toggle with theme persistence using LocalStorage.
- Developed CSV export functionality to allow users to download holiday data.
- Managed application state efficiently for handling API data and user interactions.
- Implemented search history tracking using LocalStorage to enhance user experience.
- Ensured fully responsive design and optimized UI behaviour across devices.
- Structured the application using a component-based architecture for scalability and maintainability.

2. Real-Time Customer Support Ticketing System (Jan-26 – Mar-26) Team Size: 4

Project Description:

- Developed a web-based customer support ticketing system used by support agents and managers to handle customer issues raised through multiple channels such as web forms and email.
- The system allows users to create tickets, assign priority, track ticket status, and manage resolution timelines.
- Support managers can monitor agent workload and ticket aging through dashboards.
- The application communicates with backend services via REST APIs to fetch and update ticket data in near real-time and is optimized for high-volume daily usage.

Tech Stack:

HTML5, CSS3, React JS, Tailwind CSS, REST APIs, Responsive Web Design

Roles & Responsibilities:

- Developed reusable React components for ticket creation, listing, and detailed views Integrated REST APIs to create, update, and track ticket status in real time.
- Implemented priority indicators, status badges, and conditional rendering Designed responsive layouts using Tailwind CSS for agent and manager views.
- It Managed loading states, error handling, and empty data scenarios Worked closely with backend and QA teams to validate ticket workflows

3. Content Management System (CMS) – Admin Panel (Jan-26 – Apr-26) Team Size: 7

Project Description:

- Developed an admin panel for managing website content such as pages, banners, and media assets.
- Content editors can create, update, and publish content through the CMS interface.
- The system communicates with backend services via REST APIs to ensure real-time content updates across the website.

Tech Stack:

HTML, CSS, React JS, Tailwind CSS, REST APIs, Responsive Web Design

Roles & Responsibilities:

- Developed content listing, editor, and publishing workflows Integrated REST APIs for content CRUD
- Operations Implemented role-based access for editors and admins Built responsive admin layouts using Tailwind CSS
- It Ensured UI consistency and usability for non-technical users

4. E-Commerce Web Application (MERN Stack)

Project Description:

- Developed a full-stack E-Commerce web application that allows users to browse products, add items to cart, and place orders online.
- Implemented secure user authentication and authorization for customers and administrators.
- Admin users can manage products, categories, and orders through dedicated backend APIs.
- Integrated frontend and backend using REST APIs to handle product listings, cart operations, and order management.
- Designed the system to provide a responsive and user-friendly shopping experience across devices.

Tech Stack:

MongoDB, Express.js, React.js, Node.js, Mongoose, REST APIs, JWT Authentication, HTML5, CSS3, Tailwind CSS

Roles & Responsibilities:

- Developed RESTful APIs using Node.js and Express.js for product management, cart operations, and order processing.
- Designed and managed MongoDB database schemas using Mongoose for users, products, carts, and orders.
- Built responsive user interfaces using React.js and Tailwind CSS for product browsing and checkout flows.
- Implemented JWT-based authentication and protected routes for secure user access.
- Integrated frontend React components with backend APIs to handle dynamic product data and user interactions.
- Implemented error handling, validation, and performance optimization for reliable application functionality.

EDUCATIONAL EXPERIENCE

2021-2024	BCA	Sandip University Sijoul, Madhubani	8.42 (CGPA)
-----------	-----	--	-------------

APPRECIATION

Recognized for developing responsive and reusable React components, improving development efficiency.
Appreciated for optimizing web performance and enhancing overall user experience.
